

Asiga 3D printers now integrated with exoprint by exocad. Streamlining your digital workflow.

Asiga, global leader in manufacturing repeatable and precise dental 3D printers and exocad, one of the leading CAD/CAM software manufacturers have announced software integration to help streamline their customer's digital dental workflows and improve product experience.

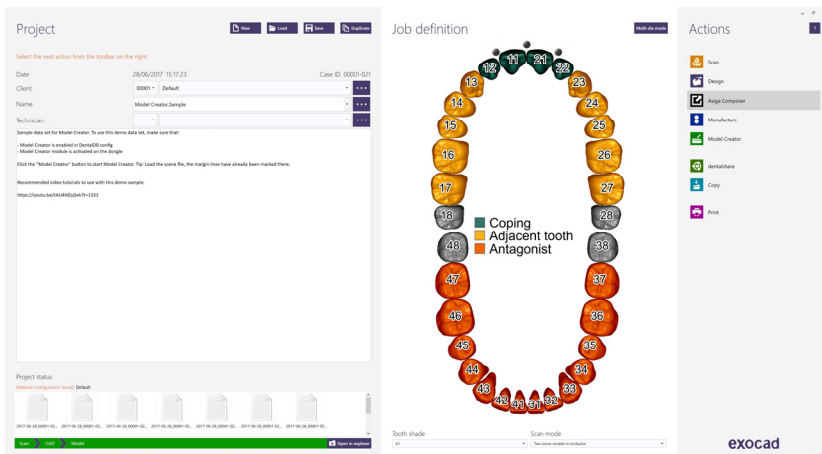

"Integrating ASIGA 3D printers into exocad and exoprint enables our users with ASIGA printer solutions to use precisely tailored ModelCreator printer presets for both solid and hollow models. Workflow integration with exoprint allows for direct access to ASIGA Composer via the exocad DentalDB workflow management software. For an even more seamless experience, exoprint also lets the user preselect the design results that he wants to print."

Akira Schüttler, System Integration Manager, exocad GmbH

“An open CAD CAM software solution and a truly open material 3D printer. Is there anything better? We are delighted to announce the completion of our integration project with exocad and exoprint. Our customers can now export fully optimized designs from exocad for production on Asiga 3D printers. This collaboration provides a truly compelling solution for the lab, increasing productivity and accelerating return on investment.”
Graham Turner, Global Operations Manager, Asiga

“Our successful cooperation with ASIGA further strengthens our approach for an open, hardware-neutral software platform by providing the best user experience while working with market leading hardware solutions.”
Akira Schüttler, System Integration Manager, exocad GmbH

About exocad GmbH

exocad GmbH is a dynamic and innovative software company committed to expanding the possibilities of digital dentistry and providing OEMs (Original Equipment Manufacturers) with flexible, reliable, and easy-to-use CAD/CAM software for dental labs and dental practices. exocad software has been chosen by leading OEMs worldwide for integration into their dental CAD/CAM offerings, and thousands of exocad *DentalCAD* licenses are sold each year. For more information and a list of exocad reseller partners, please visit exocad.com.

About Asiga Pty Ltd

In 2011 Asiga launched the world's first LED based DLP 3D printer and started the affordable desktop stereolithography revolution which changed digital manufacturing forever. Asiga won the MJA's 2012 Thinking Ahead award for best new technology which gained international recognition for the innovations contained within their precise and repeatable 3D printers. These technologies continue to lead their respective categories to this day. Asiga designs and manufactures all products at our headquarters in Sydney, Australia. For more information and a list of Asiga resellers, please visit asiga.com.
